

HYDRASYNTH

ULTIMATE PATCHES

FAST & EASY USB INSTALL GUIDE + PATCH LIST

Install Requirements

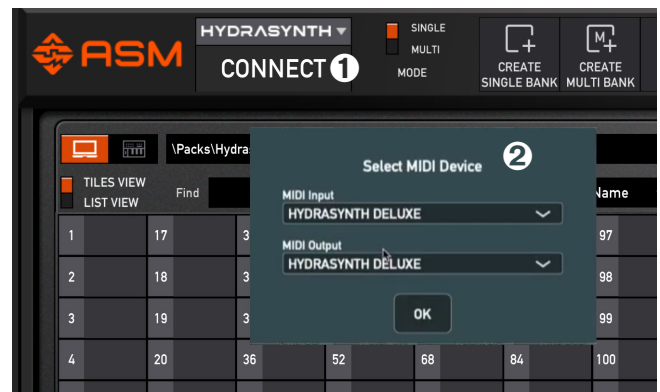

1. Hydrasynth (any model incl. Keyboard, Desktop, Explorer, and Deluxe)
2. A PC (Windows 10+) or Mac (macOS 10.15+)
3. The free ASM Patch Manager 1.5.6 (PC/Mac), with your Hydrasynth having firmware 2.0.0 or higher installed.

IMPORTANT! When playing the patches, try the mod wheel / aftertouch which are used on over 90% of the patches. Also, if you see our Macros set at 0, try them at 128 for the alternate sounds. In addition, we've included 2 versions of the patches; they are the same except one is for people using common "regular" (mono) aftertouch controllers, and the other is for those using the more rare "poly" aftertouch controllers (Hydrasynth keyboard, Lumi, CME XKey, etc). If you're not sure if your controller has mono or poly aftertouch, chances are it's mono - just install the non-poly aftertouch version. If you own the Hydrasynth keyboard version, install the poly aftertouch version. **NOTE: Patch volumes vary, as we sometimes overdrive the Amp parameter for huge saturated patches. If those patches have too much breakup for your playing style, lower the Amp value (and lose thickness though!)**

INSTALLATION - If you haven't loaded patches into your Hydrasynth before, here's how to do it. Note, you can also follow the tutorial video from ASM here if you prefer: <https://www.youtube.com/watch?v=fWPgvHDWqNY>

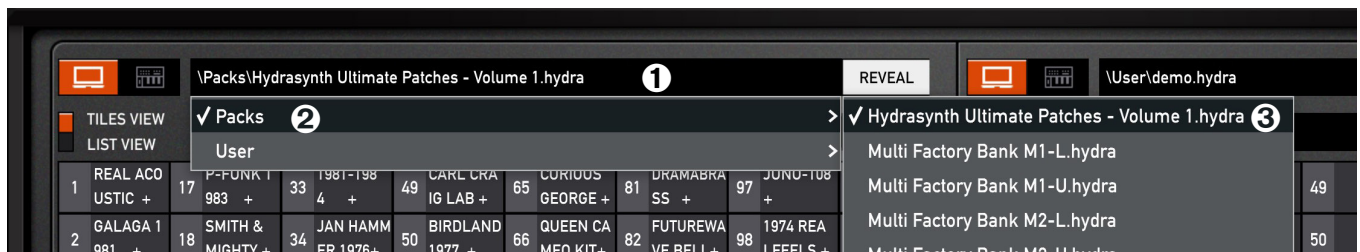

4. Install the free ASM Manager 1.5.6 (or higher) program (Windows 10+ / macOS 10.15+), and make sure your Hydrasynth is on firmware 2.0.0 or newer from <https://www.ashunsoundmachines.com/downloads>

5. Close any other app that uses midi, including Google Chrome. Plug in the Hydrasynth via USB to your PC or Mac, turn the synth on, then start the ASM Manager and click the CONNECT button ①. Select your synth in the MIDI Input/Output fields of the "Select MIDI Device" popup ②. Now's a good time to back up patches that are currently in your Hydrasynth, before you install your Ultimate Patches, as they may overwrite patches you have in the synth. For instructions on how to do this, read the "Backup and Restore" sections in the ASM Manager Guide pdf from ASM (included in the ASM Manager download) or view the tutorial video linked above.

6. Click the "Import Bank" button in the ASM Manager, then browse to and select the "Hydrasynth Ultimate Patches - Volume 1.hydra" (or Vol 2 or 3) you purchased (or for the free Taster Pack: "Ultimate Patches Taster Pack.hydra").

7. Click the black file browser dropdown ① (located on the LEFT portion of the screen), then click the "Packs" dropdown ②, then click on the Ultimate Patches Volume (the one you just imported) ③ as shown below:

The patches will now load into the slots located on the left portion of the screen.

ULTIMATE
PATCHES

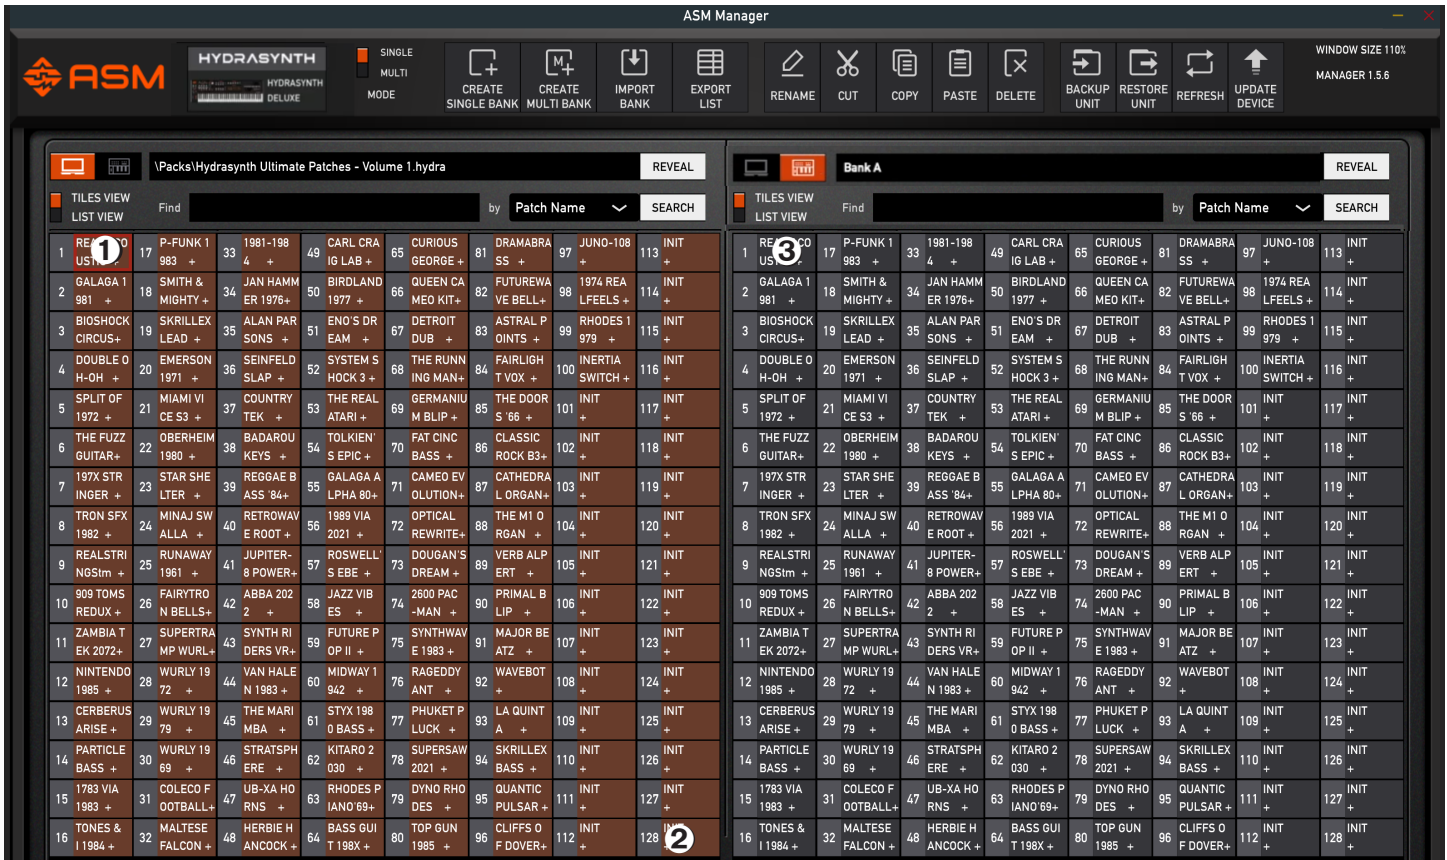

Copyright 2026 Ultimate Patches

8. On the RIGHT portion of the screen, click the “synth” icon ❶ which selects the synth banks/patch slots - the button will turn orange when activated. Now click the black dropdown ❷, and in that dropdown, select the Bank on your Hydrasynth that you wish to install the patches into, for example, “Bank A” ❷ as shown below:

The screenshot shows the ASM Manager software interface. At the top, there's a title bar 'ASM Manager' and a window size indicator 'WINDOW SIZE 110% MANAGER 1.5.6'. Below the title bar is a toolbar with various icons for file management and editing. The main area is divided into two panes. The left pane is titled 'Packs\Hydrasynth Ultimate Patches - Volume 1.hydra' and shows a grid of patch slots. The right pane is titled 'Bank A' and also shows a grid of patch slots. The 'Bank A' pane is highlighted in orange, and a dropdown menu is open showing 'Bank A' selected. The grid in both panes has columns for patch numbers and names. The 'Bank A' pane has a 'REVEAL' button next to it.

1	17	33	49	65	81	97	113
1	17	33	49	65	81	97	113
2	18	34	50	66	82	98	114
3	19	35	51	67	83	99	115
4	20	36	52	68	84	100	116
5	21	37	53	69	85	101	117
6	22	38	54	70	86	102	118
7	23	39	55	71	87	103	119
8	24	40	56	72	88	104	120
9	25	41	57	73	89	105	121
10	26	42	58	74	90	106	122
11	27	43	59	75	91	107	123
12	28	44	60	76	92	108	124
13	29	45	61	77	93	109	125
14	30	46	62	78	94	110	126
15	31	47	63	79	95	111	127
16	32	48	64	80	96	112	128

- Now, click on the first patch ❶ of the Ultimate Patches Volume that you loaded on the left portion of the screen, then shift-click the last Ultimate Patch in that volume (they're now highlighted in orange). Now, drag that first Ultimate Patch (highlighted in red when dragging) to the RIGHT portion of the screen, onto the first patch slot ❸, then release:

- After a minute or two, the Volume finishes copying over to your synth (in this example, into Bank A) and you're ready to play the patches on your synth.

Repeat the process to install other Volumes into other banks of your choice on the synth. Enjoy!

If you've followed the install instructions exactly but still have questions, you can contact us via our contact page at <https://www.ultimatepatches.com> — we respond with 24 hours.

Legal/License: Use these patches freely to create your musical compositions with — they can be used in personal or commercial recordings, or when playing live. However, none of the patches are allowed to be redistributed "as-is" or with superficial modifications — it is expressly forbidden to post them online, use them for ai training, or give them away / sell them in digital, sampled, or physical format for free or for pay/trade. These patches are for your use only. The compositions in the sequences and Youtube video demo are copyright protected via their respective owners, and music in the sequences is only for demonstration purposes of the patches. If you would like to use the musical compositions in the video for your own releases, much of the unpublished original music is available for licensing; contact support@ultimatepatches.com for information.
