

ROLAND JU-06A

ULTIMATE PATCHES

FAST 'n' EASY USB INSTALL GUIDE + PATCH LIST

Congratulations on your purchase of Ultimate Patches for Roland JU-06A!
444 patches are included in the 3-volume set: 333 patches are new for 2020, and 111 are select patches from our 2018 best-selling JU-06 Master Collection.

Install Requirements

1. A JU-06A
2. PC (Windows 7 SP1+) or Mac (OS X 10.12+)

IMPORTANT

Print + read the patch list as it contains important notes about the performance of the patches. Also, the patches using the "106" synth engine are located in Set 1 (not Set 2) of each volume.

Backup your patches

Remember to back up your patches before installing Ultimate Patches for JU-06A.

1. Hold down the JU-06A's "Bank 2" button for 2 seconds while turning on the power of your JU-06A.
2. Connect your computer to the JU-06A USB port via a USB cable. The "JU-06A" drive will appear in your hard drive list.
3. Double click (open) that "JU-06A" drive. You'll now see 2 folders: "RESTORE" and "BACKUP".
4. Copy that BACKUP folder to your computer. It contains all the files currently in your JU-06A.
5. After copying is completed, eject the USB drive and then disconnect the USB cable.

How to load our patches into your JU-06A

3. Perform steps 1-3 from the above.
4. Drag the files (that are inside the Volume/Set folder located in the JU-06A Ultimate Patches you purchased - for example; files inside the folder named Volume 1 - Set 1) into the RESTORE folder on the JU-06A drive on your computer.
5. Once the contents are done copying, press the arpeggio on/off button on your JU-06A. Wait a few seconds (until the lights stop scrolling and you see "OK" in the display of the JU-06A), then restart the JU-06A.
6. The patches are now installed.

Next page: how to create your own "mix and match" custom set of patches.

**ULTIMATE
PATCHES**

Copyright 2020 Ultimate Patches

How to create your own “mix and match” set of patches:

If you wish to select various patches and create your own collection to load into your JU-06A, it can be done, but it's a little tricky. This is how the patch numbering works in the JU-06A. In the BACKUP folder, (discussed in the installation procedure on the previous page) you'll find all the patch files, named eg; JU06A_PATCHXX.PRM, where XX is the file number (see chart on following page). That file number is NOT the patch number. See reference chart on the next page. *Note that filenames from 1-64 will load into the Juno-60 patch slots on the synth upon install, and 65-128 will load into the Juno-106.*

Some examples:

JU06A_PATCH1.PRM

is Juno-60 bank 1, patch 1, displayed on the synth as “1-1”.

JU06A_PATCH9.PRM

is Juno-60 bank 2, patch 1, displayed on the synth as “2-1”.

JU06A_PATCH128.PRM

is Juno-106 bank 8, patch 8, displayed on the synth as “8-8”.

JU06A_PATCH73.PRM

is Juno-106 bank 2 patch 1, displayed on the synth as “2-1”.

So, to create your own set of various patches, you can create a blank folder on your computer called BACKUP and then copy any patches (eg JU06A_PATCH1.PRM etc) that you want into that folder. That BACKUP folder can then be loaded (or backed up) on your JU-06A as instructed on page one of this manual. In addition, you can renumber any of those patch filenames so they load into the JU-06A patch slot you prefer (see chart on next page).

If you have any questions at all, please contact us via the contact page on our website **UltimatePatches.com** — we usually respond within a few hours, and usually the same day.

Legal: Use these patches freely to create musical ideas and songs with — they can be used in personal or commercial recordings or playing live. None of the patches can be redistributed for free, and/or resold in any way. The compositions in the sequences and Youtube video demo are copyright protected via their respective owners, and are used in the sequences only for demonstration purposes of the patches. Much of the original music in the Youtube video demo / sequences is available for purchase or licensing for your own recordings; contact support@ultimatepatches.com for more information.

**ULTIMATE
PATCHES**

Copyright 2020 Ultimate Patches

Here's a chart showing the patch number in the filename followed by the corresponding bank/patch number displayed on the JU-06A.

eg. JU06A_PATCH56.PRM is patch is actually patch 7-8 on the synth display.

Should you have any difficulties feel free to contact support@ultimatepatches.com. We typically reply within 24 hours. We want you to get up and running to enjoy your patches! :)

Note: Filenames 1-64 are Juno-60 patch slots, and filenames 65-128 are Juno-106 patch slots.

| 47. CE-2 P-BASS | 87. BAMBOO FLUTES |
| 48. WHAM! STRINGS | 88. POST MALONE - GOODBYES |

Note: Items in ***Bold Italic*** are patches (usually unison) designed by us to be played one key at a time. All Juno-60 patches in this 3-volume collection are brand new for 2020!

Some patches named as "bass" need to be played via an external keyboard controller, as the 2 octave JU-06A keyboard cannot reach the low notes.

* Future Strings: play only 3 notes at a time (no more and no less) to get the patch to sound as we intended.

To play as an arp as heard in our Youtube demo, use the Nintendo Arp settings below but with Rate: 16.

** Posner arp settings are: Tempo 60, Mode: Up, Range: 2, Rate: 64T

*** Nintendo Arp settings are: Tempo 97, Mode: Down, Range: 3, Rate: 64T
