

MESSENGER

ULTIMATE PATCHES

FAST & EASY USB INSTALL GUIDE + PATCH LIST

Congratulations on your purchase of Moog Messenger Ultimate Patches, one of the most popular premium patch sets for the synth. Enjoy these 200 all-new sounds that bring your Messenger to the next level — with patches ranging from authentic vintage to classic modern to inspiring futuristic sounds!

Install Requirements

1. A Moog Messenger Synthesizer with firmware 1.1.0 or higher
2. The free Messenger Preset Editor 1.0.3 or higher (PC/Mac):
<https://www.moogmessenger.com/moog-messenger-downloads.html>
(Requires a PC: Windows 10 or higher, or Mac: macOS 14 or higher)

- or if you prefer to install .syx files: -

The free MIDI-OX program (PC) : <http://www.midiox.com>

or free SysEx Librarian program (Mac): <https://www.snoize.com/SysExLibrarian/>
(Requires a PC: Windows 7 or higher, or Mac: macOS 10.7 or higher)

IMPORTANT!

- **Nearly all the patches have aftertouch assigned. Try them out!**
- **The patches have an “UP” at the end of the patchname to denote they’re from Ultimate Patches.**
- **We’ve included single patches and full volumes for your convenience.**
- **We’ve included the patches in both “syx” and Messenger Preset Editor formats.**
- **Patch volumes vary, as we sometimes overdrive patches for saturated sounds, and underdrive for more delicate sounds.**

Notes on the free Taster Pack

- If you’re installing the Taster Pack (a free sampler of 15 sounds from the Volumes 1+2 pack), they are provided only in single patches format. To install these single patches, follow the instructions on page 6 or 7.

License/legal: Use these patches freely to create musical ideas and songs with — they can be used in personal or commercial recordings or playing live. None of the patches can be redistributed for free and/or resold in any way, even with superficial alterations. The compositions in our Youtube video demos are copyright protected via their respective owners, and are used in the videos only for demonstration purposes of the patches. Much of the original music in our Youtube video demos is available for purchase or licensing for your own recordings; contact support@ultimatepatches.com for more information.

ULTIMATE PATCHES

Full volume(s) patch installation using Moog's Messenger Preset Editor (PC/Mac)

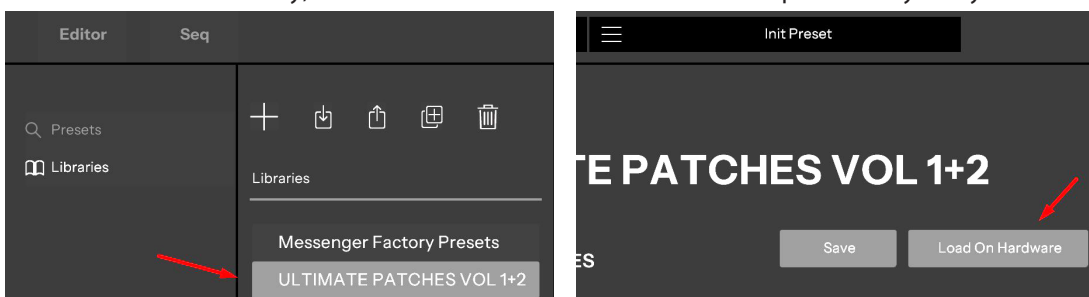

1. Unzip the file you downloaded from us, to a folder on your desktop. This folder contains the patches/manual.
2. Download and install the free Messenger Preset Editor (Librarian):
<https://www.moogmessenger.com/moog-messenger-downloads.html>
(Requires a PC with Windows 10 or higher or Mac with macOS 14 or higher)
3. Connect your Messenger to your computer via USB cable. Before starting the Messenger Preset Editor, close all other audio or MIDI or DAW software, and disconnect all other MIDI devices.
NOTE: all patches in the synth will be overwritten when installing the volume(s) of patches.
We recommend first backing up your current sounds if you want to keep them (instructions on page 4).
4. Open The Messenger Preset Editor. Click in the black area to the right of the hamburger icon:

5. Now, click on **Libraries** (near the book icon), then click the "import patch library" icon (arrow pointing down):

6. In the window that opens, select the volume(s) to install (located in our folder EDITOR LIBRARIAN VERSIONS):
MESSENGER-ULTIMATE-PATCHES-VOLUME-1+2-LIBRARIAN.zip (or if you purchased only a single volume:
MESSENGER-ULTIMATE-PATCHES-VOLUME-1-LIBRARIAN.zip or
MESSENGER-ULTIMATE-PATCHES-VOLUME-2-LIBRARIAN.zip) and click **Open**.
The Ultimate Patches volume(s) will now appear in the **Libraries** area under the 5 icons as shown below.
7. In that Libraries area, click on **ULTIMATE PATCHES VOL 1+2** (or Volume 1 or 2 if you purchased those volumes individually) then click **Load on Hardware** to send the patches to your synth.

MESSENGER

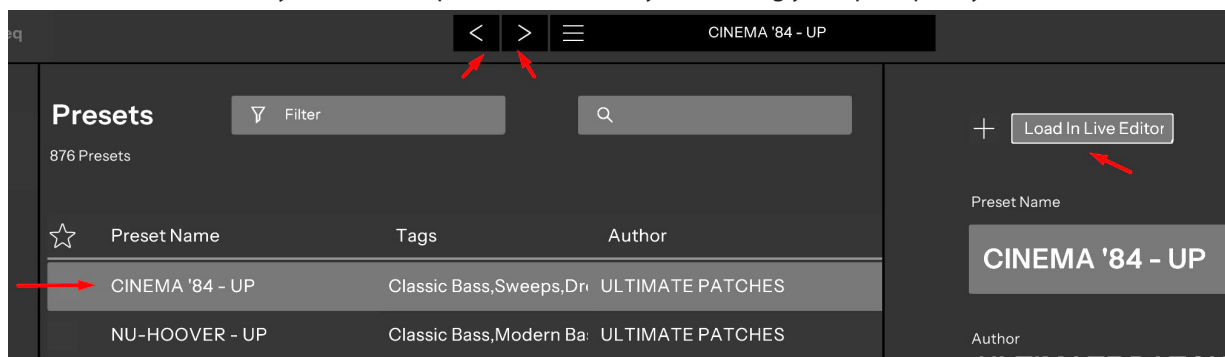

ULTIMATE PATCHES

Auditioning or installing a single patch using Moog's Messenger Preset Editor (PC/Mac)

1. Complete steps 1-6 listed on the previous page.
2. Click on **Presets** to see all presets that are available to be installed on the synth.

3. Now you can play/audition a single preset on your synth by selecting the patch you wish to hear (for example, **CINEMA '84** shown below, then click the **Load In Live Editor** button in the program. The patch now sends that patch to the currently selected slot on your synth for you to try out. You can also use the < and > buttons to browse through and try other sounds. Note that the patch in the currently selected slot on your synth will not be overwritten until you do a Save procedure on the synth, freeing you up to quickly audition sounds.

ULTIMATE PATCHES

Patch backup using Moog's Messenger Preset Editor (PC/Mac)

1. Complete steps 2-4 from page 3.
2. Click on **Libraries** (to the right of the book icon) then click the "plus" icon. Now, click **Build From Device Presets**:

3. Once the patches have finished transferring from your synth, select **New Device Pack** in the libraries area, then click the "save patch library" icon (arrow pointing up):

4. In the window that opens, browse to where you wish to save your synth patches and do so. The patches currently in your synth are now backed up to your computer. You can reinstall them at any time using the install instructions on the previous pages.

MESSENGER

ULTIMATE PATCHES

Installation of full volume(s) or a single patch using PC (MIDI-OX)

1. Unzip the file you downloaded from us, to a folder on your desktop. This folder contains the patches/manual.
2. Download the free MIDI-OX program from <http://www.midiox.com> and install.
3. Reboot your PC. Connect your synth to your PC via USB cable. Before starting MIDI-OX, close all other audio or MIDI or DAW software, and disconnect all other MIDI devices.
4. Open MIDI-OX. From the Options menu of MIDI-OX, choose "MIDI Devices."
5. Click the synth's name in the MIDI Inputs and MIDI Outputs areas of that MIDI Devices window. Click OK to close the dialog and save the settings.

Backup your existing patches

Patches currently in the synth will be overwritten so now is the time to backup all of your sounds:

6. In MIDI-OX, select View > Sysex. The "SysEx View and Scratchpad" window will pop up.
7. In that window, select Sysex > Receive Manual Dump. The "SysEx Receive" window opens.
8. On your synth, press the SETTINGS button then CONFIG button (button #16).
9. Press the synth's PAGE button so the 3rd page (48) lights up. Press button #7 to begin the sysex data transfer.
10. MIDI-OX will receive the data which will take up to a minute or so and during the process "Wait for completion" and "Bytes Received" will display. Once the Bytes Received are no longer changing, click "Done."
11. In the Display Window menu, click Save As to save your sysex (.syx) file to your PC. It is now backed up.

Install your Ultimate Patches (Important! This will overwrite patches in your synth*)

12. From the View > Sysex > Command Window menu of MIDI-OX, choose "Load File" to open the .syx format patch file you wish to install. eg; **MESSENGER ULTIMATE PATCHES - VOLUME 1+2.syx**, or a single patch (or single Volumes 1 or 2 if you purchased one volume only).
13. From the same Command Window menu, choose "Send SysEx." The patch(es) will now send to your synth taking a couple seconds (for a single patch), up to a minute or so for a full volume(s), and will replace any existing patches previously on your synth*. If installing a full volume(s), buttons 1-16 will light up one by one, and install is done once this is complete. Reboot your synth. You're ready to play!

***Installing a full volume(s) will overwrite ALL patches in the synth. Installing a single patch will only overwrite the patch slot currently selected on the synth.**

ULTIMATE PATCHES

Installation of full volume(s) or a single patch using Mac (SysEx Librarian)

1. Unzip the file you downloaded from us, to a folder on your desktop.
2. Download and install the free SysEx Librarian: <https://www.snoize.com/sysexlibrarian> and, if needed, scroll down the page to choose the SysEx Librarian version for your macOS version.
3. Connect your synth to your Mac via USB and reboot your Mac. Before starting SysEx Librarian, close all other audio or MIDI or DAW software, and disconnect all other MIDI devices.

Backup your existing patches

Patches currently in the synth will be overwritten so now is the time to backup all of your sounds:

4. Run SysEx Librarian and hit the Record One button.
5. On your synth, press the SETTINGS button then CONFIG button (button #16).
6. Press the PAGE button so that the 3rd page (48) lights up. Press button #7 to begin the sysex data transfer.
7. You'll see "Done" in SysEx Librarian once the data has been received. This file is now stored in your "SysEx" folder. By default, this is a folder named "SysEx Librarian", in the Documents folder in your home folder.

Install your Ultimate Patches (Important! This will overwrite patches in your synth*)

8. Run SysEx Librarian and choose your synth as the Destination.
9. Click Add/+ to add the .syx file you downloaded from us - eg; **MESSENGER ULTIMATE PATCHES - VOLUME 1+2. syx**, or a single patch (or single Volumes 1 or 2 if you purchased one volume only) to the file list — or simply drag and drop the file on the open SysEx Librarian window. The file name appears in the file list and should be highlighted.

In SysEx Librarian, click Play. The patch(es) will now send to your synth taking a couple seconds (for a single patch), up to a minute or so for a full volume(s), and will replace any existing patches previously on your synth*. If installing a full volume(s), buttons 1-16 will light up one by one, and install is done once this is complete. Reboot your synth. You're ready to play!

***Installing a full volume(s) will overwrite ALL patches in the synth. Installing a single patch will only overwrite the patch slot currently selected on the synth.**

If you need it, more detailed instructions + troubleshooting of SysEx Librarian are at <https://www.snoize.com/sysexlibrarian/docs.html>
