

MINIFREAK

ULTIMATE PATCHES

FAST & EASY USB INSTALL GUIDE, PATCH LIST + LICENSE

Congratulations on your purchase of MiniFreak / MiniFreak V Ultimate Patches, one of the best-selling MiniFreak collections. With 250 premium sounds spanning vintage, modern and futuristic, you'll find plenty of musically useful patches for your creations!

Notes

- Patches compatible with MiniFreak V softsynth plugin as well as all MiniFreak hardware synths.
- All patches use only factory samples / wavetables - no custom samples etc. are required.
- Aftertouch and mod wheel are assigned in nearly all of the presets. Macros are not used.
- Join the MiniFreak user community at <https://www.facebook.com/groups/294010297925162>
- These patches have a hyphen before the patchname to denote these are Ultimate Patches.

Install Requirements

1. A MiniFreak + MiniFreak V, both with firmware 4.0.1+ Or, MiniFreak V only with 4.0.1+.
2. Firmware download is available at the MiniFreak User Community site:
<https://www.arturiaminifreak.com/minifreak-downloads.html>
3. A PC (Windows 10+) or Mac (OS X 10.13+)

Backup

1. Backup your patches now, as they may be overwritten when you install patches.
To learn how to do this, patch management info can be found in the MiniFreak V manual including the **MiniFreak Hardware Preset Management** section.

Installation to MiniFreak V Softsynth Plugin (if you don't own a hardware MiniFreak)

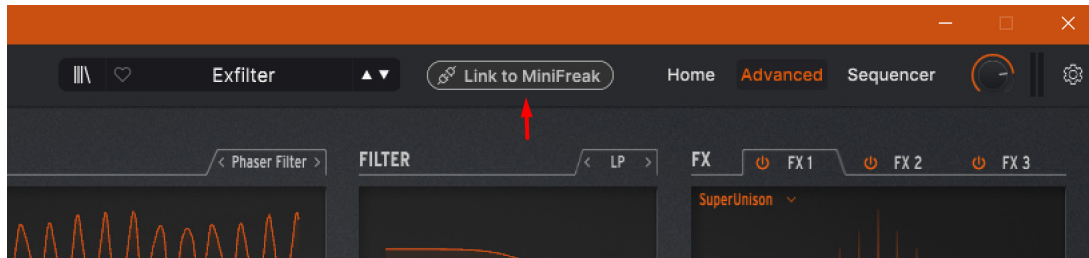

1. Unzip the zip file you received from us, to a folder on your computer.
2. Open MiniFreak V. Continue the installation steps from step 7 on the next page.

Installation to MiniFreak Hardware

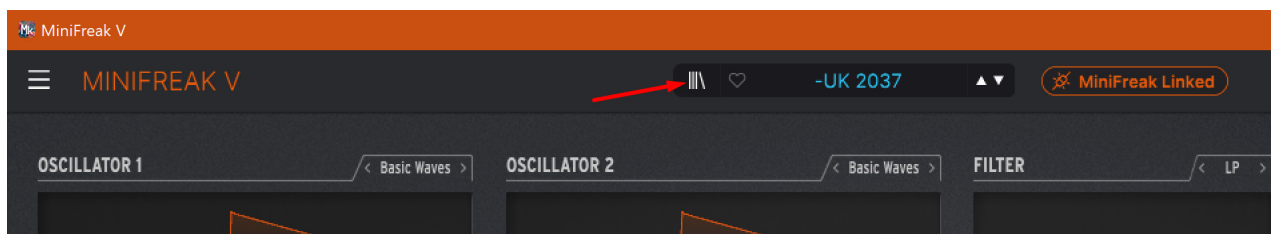

1. Unzip the zip file you received from us, to a folder on your computer.
2. To load the patches into your MiniFreak hardware, you will first load them into the MiniFreak V software (free with purchase of a MiniFreak). If you don't own a hardware MiniFreak, you can purchase just the plugin version of the MiniFreak (MiniFreak V) from Arturia.
3. If you own a hardware MiniFreak and don't yet have MiniFreak V installed, download MiniFreak V from your account on the Arturia website. You will first need to register your MiniFreak at <https://www.arturia.com/products/hardware-synths/minifreak/start>
4. Once you've registered, download MiniFreak V and install. Arturia will provide a link but you can re-download it: [arturia.com/myarturia#products](https://www.arturia.com/myarturia#products) — the MiniFreak V manual has more activation and other information if you need it, under **ACTIVATION AND GETTING STARTED**.

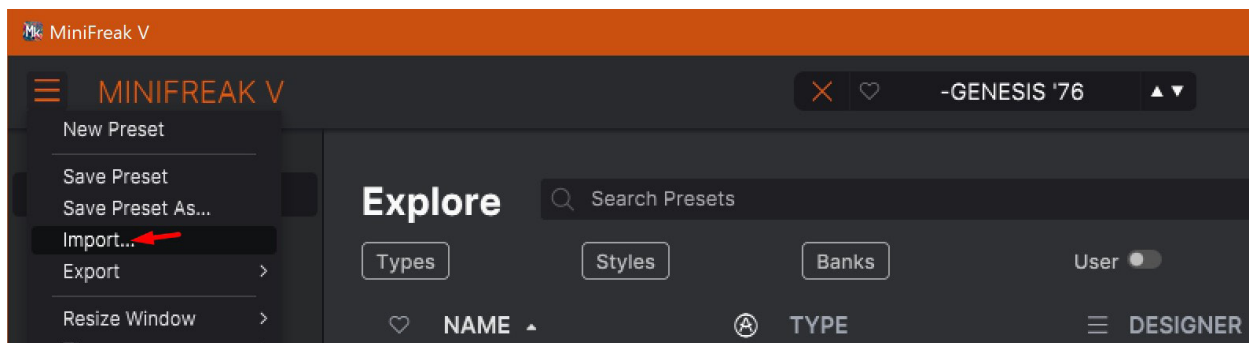

- Once MiniFreak V is installed, connect the hardware MiniFreak to your computer via USB, and open MiniFreak V. Now, click the 'Link to MiniFreak' button at the top of the screen:

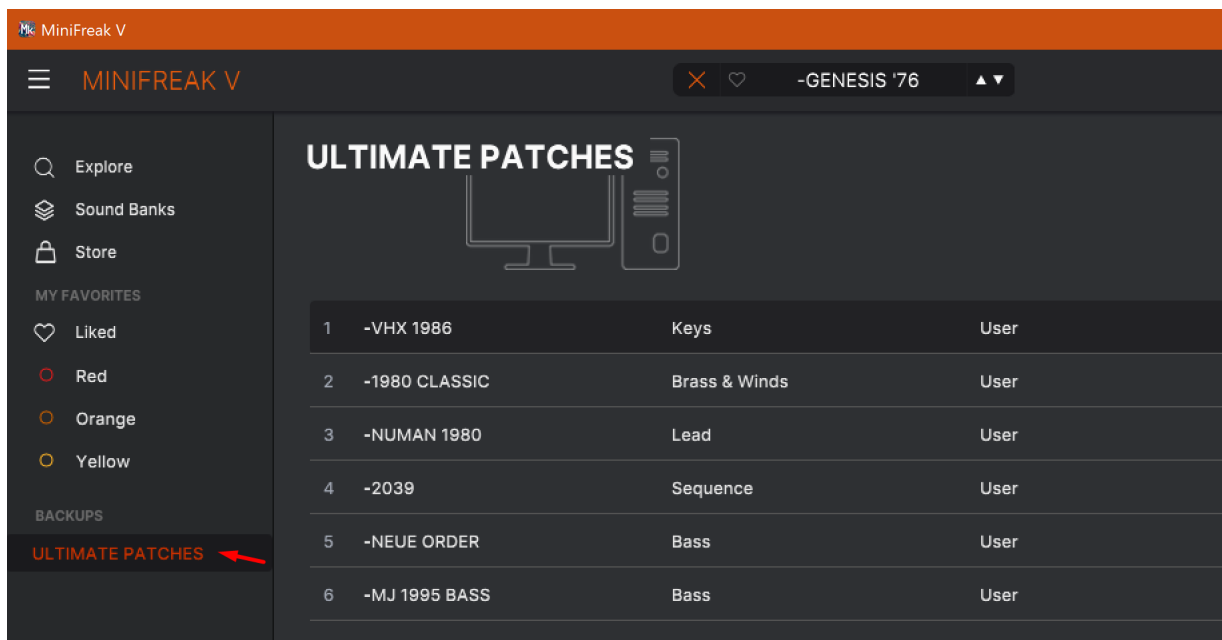

- Click the preset browser icon at the top of the screen. The program will now sync with the hardware MiniFreak.

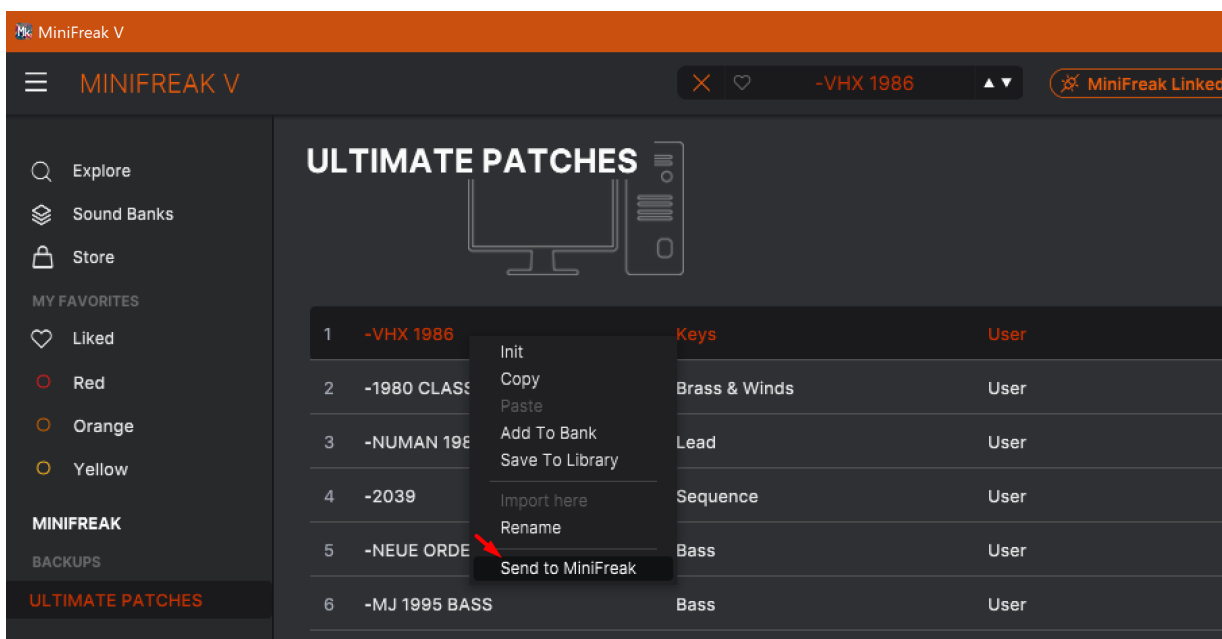

- Click the 3-line icon in the top left corner, and select "Import".

8. In the popup that appears, select the **ULTIMATE PATCHES.mnfbackup** file from the folder you unzipped to, and click **OPEN** to install. After a few seconds, “Patch backup imported successfully” will appear. You will now see **ULTIMATE PATCHES** listed in the **BACKUP** area on the left side of the screen. Click that to see all the patches. To send all the patches to the hardware synth, right click that same **ULTIMATE PATCHES** link and select “Send to MiniFreak”.

9. To install a single patch to the hardware synth, select the patch and right click. Select “Send to MiniFreak”. To learn more patch management, instructions are in the MiniFreak V manual.

Troubleshooting

There is a MiniFreak V software bug that in some cases causes errors such as missing samples, freezing when trying to import to the hardware, etc.. If you have these kinds of issues, simply uninstall and reinstall your MiniFreak V software using version 4.0.1 or higher.

License

Use these patches freely to create musical ideas and songs with — they can be used in any personal or commercial recordings or for playing live. None of the patches can be redistributed for free, and/or resold in any way, with or without superficial changes. The compositions in the sequences and Youtube video demo are copyright protected via their respective owners, and are used in the sequences only for demonstration purposes of the patches. Much of the original music in the Youtube video demo / sequences is available for purchase or licensing for your own recordings; contact support@ultimatepatches.com for more information.

Support

Questions? Feel free to contact us anytime; we reply within 24 hours at **UltimatePatches.com** — we usually respond within a few hours.

About Ultimate Patches

As seen in news from Arturia, Behringer, Sequential, Korg UK, IK Multimedia and more, our affordable and easy to install high-quality synth patches / presets have become the top pick for professional, semi-pro, and casual synth enthusiasts worldwide since our founding in 2015. Ultimate Patches have been used in Top-40 hits, movies, TV, commercials, AAA video games, and home studios in over 83 countries. Join the fun and bring your synth to the next level!

We've got lots of new synth patches coming, so check out our frequently updated News section at <https://www.ultimatepatches.com> for new releases, teasers, and more.
