

UB-1

ULTIMATE PATCHES

FAST & EASY USB INSTALL GUIDE + PATCH LIST

From the makers of the UB-1's factory presets (UB-1 ULTIMATE PATCHES — Volume 4) comes the all-new **UB-1 ULTIMATE PATCHES — Volumes 1-3**, one of the most popular premium patch sets for the synth with 100 next-level sounds ranging from vintage to modern to futuristic. Dig in!

Install Requirements

1. A Behringer UB-1 Micro synthesizer
2. A PC (Windows 7 or higher) or Mac (macOS 10.10 or higher)
3. Behringer's free Synthtribe program (PC/Mac) from the UB-1 Micro product page at behringer.com

IMPORTANT!

- **Pro Tip:** Try out pitch and mod wheels on the patches if using an MIDI controller keyboard (highly recommended).
- We've included single patches and full volumes. You can install them using Behringer's free Synthtribe program.
- Patch volumes vary, as we sometimes overdrive patches for saturated sounds, and underdrive for delicate sounds.
- You've purchased Volumes 1,2 and/or 3. Volume 4 is included for free as the factory presets of the synth.

INSTALLATION - If you haven't loaded patches into your UB-1 before, here's how to do it:

1. **PREPARE:** First, plug your UB-1 to your PC or Mac via USB, then install and start the free Behringer Synthtribe program. Turn on your UB-1. You will now see a picture of the UB-1 in Synthtribe. Click "Get Started".
2. **BACK UP:** Patches currently in the synth will be overwritten when installing patches. However, the synth's factory presets (**UB-1 ULTIMATE PATCHES - VOLUME 4**) can be reinstalled at any time by doing a factory reset (SETTINGS menu), or by downloading them and installing them using the install instructions below. Volume 4 as available at <https://www.ultimatepatches.com/synth-patches-presets/behringer-ub-1/behringer-ub-1-patches-presets.html>
Now on to backing up: on your synth, press the SETTINGS button then scroll until you see PROG BULK SYX - HIT ENT TO SEND (saves all patches from the synth) in the synth's display. Now, in Synthtribe, press **Receive - All Presets** to transfer the patches to your computer. A window will appear where you now choose where to save them. Click "Save". Once saved, your patches are now backed up.
3. **INSTALL:** If you want to install a single patch only, first scroll to your chosen slot on the synth. If installing a full volume, that step is not necessary. Now, to install a single patch or a full volume: Press the synth's **SETTINGS** button then scroll until you see SYSEX RECEIVE LISTENING on the synth's display. Now, in Synthtribe, press **Send: All Presets** (or press **Send: Active Preset** if installing one patch only). A window will appear on your computer where you now find and select the single or volume of patches you wish to install. Select the desired single patch or volume and click OPEN. After a second or two, the UB-1 displays SYSEX RECEIVE SUCCESS. Patch install is done, and you're ready to play! Note: the synth's patch memory can hold up to 32 patches at a time.

If you've followed the above instructions but have questions, feel free to contact us via the contact page on our website **UltimatePatches.com** — we usually respond within a few hours, and usually the same day!

Legal: Use these patches freely to create musical ideas and songs with — they can be used in personal or commercial recordings or playing live. None of the patches can be redistributed for free and/or resold in any way, even with minor alterations. The compositions in our Youtube video demos are copyright protected via their respective owners, and are used in the videos only for demonstration purposes of the patches. Much of the original music in our Youtube video demos is available for purchase or licensing for your own recordings; contact support@ultimatepatches.com for more information.
