

UB-Xa

ULTIMATE PATCHES

FAST & EASY USB INSTALL GUIDE + PATCH LIST

Congratulations on your purchase of UB-Xa ULTIMATE PATCHES — one of the best selling patch sets for the synth, with 300 premium vintage, modern & futuristic sounds. There are 100 sounds in each volume (90 Single patches and 10 Double patches), and has it's own atrophy & performance (paddles) settings saved per-patch (we don't overwrite or alter your 8 main atrophy profiles). Also, we include single and complete volume syx formats. Enjoy these next-level UB-Xa sounds designed with Behringer's latest firmware update "Update 2.0" capabilities.

Visit the **UB-Xa Facebook Group** to join the community of UB-Xa users: <https://www.facebook.com/groups/behringerubxa>

Install Requirements

1. A Behringer UB-Xa or UB-Xa D synth with firmware v0.3.117 or higher (update instructions below)
2. A PC (Windows 7 or higher) or Mac (macOS 10.10 or higher)
3. The free Behringer SynthTribe program v2.8.3 or newer (PC or Mac):
<https://www.behringer.com/product.html?modelCode=0722-AAF>
4. The free MIDI-OX (PC) or free SysEx Librarian (Mac): www.midiox.com • <https://www.snoize.com/SysExLibrarian/>

IMPORTANT!

1. **Before installing the patches, you must calibrate your UB-Xa (GLOBALS > Recalibrate) to ensure the patches sound as intended. This takes about 2 minutes and is super important, as analog synths drift out of calibration over time and the patches may not sound like they do in our Youtube video without calibrating first.**
2. **Aftertouch and/or both of the 2 performance paddles are implemented in every one of the patches, for expressive and unique alternative sound options. Try them out!**
3. **Volumes vary from patch to patch, as we sometimes overdrive the analog outs for huge saturated patches, and "underdrive" others for more delicate sounds that require much lower volumes.**

INSTALLATION PREPARATION

1. First, make sure your UB-Xa is updated to Firmware v000.003.117 (also known as "Update 2.0") or newer. To check your firmware version, go to GLOBALS > Firmware Version. To update your firmware, turn on and connect your synth to your PC/Mac via USB, and open the SynthTribe program on your PC/Mac. Choose "Update" and follow the prompts. If the update fails for whatever reason, just try again as it nearly always works on the second try.

2. Download and install the free MIDI-OX (PC) or free SysEx Librarian (Mac):
www.midiox.com • <https://www.snoize.com/sysexlibrarian/>

3. Some settings in the synth's GLOBALS menu need to be set. You can manually do this (see the 4 GLOBALS settings below), or instead install the GLOBALS.syx file we've provided you (which will overwrite your current GLOBALS settings) by going to the MIDI-OX Command Window menu, and choosing "Load File." Then, browse to and open the Globals.syx that is included in your purchase from us, then from the Command Window menu, choose "Send SysEx." It will complete within a couple seconds.

If you prefer to manually set the GLOBALS settings, set them as follows:

GLOBALS > Miscellaneous > Background Cal (Enable)
GLOBALS > Miscellaneous > Side Panel > Save Patch (X)
GLOBALS > Miscellaneous > Side Panel > Load Transp (X)
GLOBALS > Miscellaneous > Disable > Pulse Revert ()

4. On your UB-Xa, set USB/MIDI > Device ID to 1. Set USB/MIDI > Sync to "Internal".

FAST & EASY USB INSTALL GUIDE + PATCH LIST

PC Instructions

BACKUP — PC (MIDI-OX)

1. Now's the time to **backup the patches that are currently in your UB-Xa before you install Ultimate Patches, because the doubles + following banks of patches will be overwritten:** Ultimate Patches Volume 1 overwrites Bank A, Volume 2 overwrites Bank B, Volume 3 overwrites Bank C, and the optional free Taster Pack (15 patches taken from Volumes 1-3) overwrites Bank D. *Note: you can reload the factory patches back in at any time using the synth's GLOBALS > Factory Defaults options. You can load back in your backed up patches at any time by using the install steps in this manual.*
2. Reboot your PC. Complete steps 1-5 of the "INSTALLATION — PC (MIDI-OX)" section below.
3. In MIDI-OX, Select View > Sysex
4. Then select Sysex > Receive Manual Dump. The "SysEx Receive" window will open.
5. On your UB-Xa, go to GLOBALS > Sysex Data Dump and choose the bank/settings etc. you wish to back up. Press the SELECT dial to start the transfer.
6. MIDI-OX will receive the data within a few seconds and "Wait for completion" / Bytes Received" displays. Click "Done."
7. Go to Display Window > Save As to save your sysex (.syx) file to your PC. It is now backed up there.

INSTALLATION — PC (MIDI-OX)

1. Set the synth's ARPEGGIATOR RATE knob to approximately the middle.
2. Reboot your PC. Connect your UB-Xa to your PC via USB cable.
3. Open MIDI-OX. From the Options menu of MIDI-OX, choose "MIDI Devices."
4. Click "UB-Xa" in the MIDI Inputs and MIDI Outputs areas of that MIDI Devices window.
5. Click OK to close the dialog and save the settings.
6. From the View menu, choose "SysEx." Then, in the pop-up window, in the SysEx menu, choose "Configure."
7. Set the Low Level Output and Input Buffers "Size" to 512 and "Num" to 32. Under Output Timing, make sure that "Auto-adjust Buffer Delays if necessary" is NOT enabled. Click OK to close the dialog and save the settings.
8. From the Command Window menu, choose "Load File." Browse to then "open" the desired file, for example: **ULTIMATE PATCHES - VOLUME 1.syx** (or Volume 2, 3, a single patch, the Doubles, or Taster Pack) that you downloaded from us.
9. From the Command Window menu, choose "Send SysEx." The patches now send to your UB-Xa. To install more patches, repeat the above step then this one. You're ready to play!

ULTIMATE PATCHES

FAST & EASY USB INSTALL GUIDE + PATCH LIST

Mac Instructions

BACKUP — Mac (SysEx Librarian)

1. Now's the time to **backup the patches that are currently in your UB-Xa before you install Ultimate Patches, because the doubles + following banks of patches will be overwritten:** Ultimate Patches Volume 1 overwrites Bank A, Volume 2 overwrites Bank B, Volume 3 overwrites Bank C, and the optional free Taster Pack (15 patches taken from Volumes 1-3) overwrites Bank D. *Note: you can reload the factory patches back in at any time by using the synth's GLOBALS > Factory Defaults options. You can load back in your backed up patches by using the install steps in this manual.*
2. Turn on and connect your UB-Xa via USB to your Mac and reboot your Mac. If you haven't done it yet, download and install SysEx Librarian. Run SysEx Librarian and hit the Record One button.
3. On your UB-Xa, go to GLOBALS > Sysex Data Dump and choose the bank/settings etc. you wish to back up. Press the SELECT dial to start the transfer.
4. You'll see "Done" in SysEx Librarian once the data has been received. This file is now stored in a folder on your Mac — by default, this is usually in a folder named "SysEx Librarian", in the Documents folder in your home folder.

INSTALLATION — Mac (SysEx Librarian)

1. Set the synth's ARPEGGIATOR RATE knob to approximately the middle. Turn on and connect your UB-Xa to your Mac and reboot your Mac. If you haven't yet, download and install SysEx Librarian. Run SysEx Librarian and choose UB-Xa as the Destination.
2. Click Add/+ to add **ULTIMATE PATCHES - VOLUME 1.syx** (or Volumes 2, 3, a single patch, the Doubles, or Taster Pack) to the file list or drag & drop the file on the open SysEx Librarian window. The highlighted filename appears in the file list.
3. Click Play. The patches now send to your UB-Xa. You're ready to play!
4. If you need it, more detailed instructions + troubleshooting are at <https://www.snoize.com/sysexlibrarian/docs.html>

Note: The music played in our Youtube videos are played as demonstrations of the patch and are not included. To help with your patch organizing, the patches have "UP" (Ultimate Patches) at the end of the patch name as an indicator the patch is from us.

If you've followed the install instructions exactly but still have questions, feel free to contact us via the contact page on our website [UltimatePatches.com](https://www.ultimatepatches.com) — we usually respond within a few hours and usually the same day!

Legal/License: Use these patches freely to create your musical compositions with — they can be used in personal or commercial recordings, or when playing live. However, none of the patches are allowed to be redistributed "as-is" or with superficial modifications — it is expressly forbidden to post them online or give them away in digital or physical format for free or for pay/trade. These patches are for your use only. The compositions in the sequences and Youtube video demo are copyright protected via their respective owners, and music in the sequences is only for demonstration purposes of the patches. If you would like to use the musical compositions heard in the video for your own releases, some of the unpublished original music is available for licensing; contact support@ultimatepatches.com for information.
